-

PROJECTS

CoWIN application (Vaccine Scheduler): *[C#, SQL, Visual Studio]*

- ❖ Implements the functioning of the web portal cowin.gov.in .
 - ❖ Visual Studio 2022 has been used to organize and lay-out the UI, along with setting up the code and accessing the database in SQL Server.
 - ❖ It allows the client to connect to the SQL server and login/register by entering their credentials (phone number, username, password).
 - ❖ The user can then register for vaccination and then schedule/reschedule their vaccination by filling all their details, as well as selecting their nearest center.
-
