PROJECTS

CoWIN application (Vaccine Scheduler)

C#, SQL

- Implements the functioning of the web portal cowin.gov.in . Visual Studio 2022 has been used to organize and lay-out the UI, along with setting up the code and accessing the database in the server.
- It allows the client to connect to the database server and login/register by entering their credentials (phone number, username, password).
- The user can then register for vaccination and then schedule/reschedule their vaccination by filling all their details, as well as selecting their nearest center

SKILLSET

- Proficient in C++
- Skilled in Structured Query Language (SQL)
- 1851 Rating on leetcode.com (500+ questions solved)
